

Synopsis Lab 9

9.1 Tasks

1. Review all Haskell and ML functions you were asked to study in Synopses #6, #7 and #8.
2. Review and fix the sources you wrote in Lab #6, #7 and #8. Add your name on the first line of each file written by you. When instructed, create a `.tgz` archive containing all these sources and upload it on moodle.
3. (optional) Try to improve the code for the code challenge presented in Lecture #7. To claim your bonus, your code must meet the requirements specified in the aforementioned lecture.
